Welcome to Ingestors's documentation!

Ingestors extract useful information in a structured standard format.

`build unknown` `docs latest`

- Free software: MIT license
- Documentation: https://ingestors.readthedocs.io.

Here's some key features:

- TODO

Installation

To install Ingestors, use *pip* or add it to your project dependencies.

```
$ pip install ingestors
```

If you don't have *pip* installed, this Python installation guide can guide you through the process.

Documentation

The documentation for Ingestors is available at ingestors.readthedocs.io.

Feel free to edit the source files in the `docs` folder and send pull requests for improvements.

To build the documentation, please install the dependencies first and run `make docs` :

```
$ pip install -r requirements_dev.txt
$ make docs
```

Now you can browse the documentation locally at `http://localhost:8000/docs/_build/html/` :

```
$ make docs-web
```
